

ASSIGNMENT - Upload the solution to the CATs by your ID

For your assignment, you need to do the following procedures. You can download the required files from Resources section in CATS. You can submit your assignment in word or pdf format.

PROCEDURE 1 - Attach the AdventureWorks2019.bak file your sample database to your SQL Server instance (40 Points).

- You should write down all the steps you followed while adding the AdventureWorks2019.bak to the SQL Server Management Studio as a database and take screenshots (40 Points).

PROCEDURE 2 - Performing operations on a table in the database (60 Points)

- Select any table from this database you have loaded and take a screenshot of the section showing the column properties (Column Name, Data Type, Allows Null), (30 Points).
- Show the previously entered data in the selected table and take a screenshot of this result (15 Points).
- Change any value in a column in this selected table and take a screenshot of this result (15 Points).

Note: I will have a Zero-Tolerance approach to cheating. If you copy from another's scripts or allow someone to send same assignment, I will give zero grade to those who posted the same assignment.
